

GRAD SCHOOL:

-How does graduate study differ from undergraduate study and how can understanding this help me prepare stronger, more effective grad applications?

-Why would I want to get a PhD?

-How do I select programs? How many should I apply to?

-Should I contact faculty at the grad programs I intend to apply to? How should I contact faculty? What questions should I ask?

-How does the admissions process work, what are faculty looking for?

-How do I deal with blemishes in my academic career (a so-so GPA, mediocre GRE scores, or not enough research experience) and still get into a good graduate program?

-How can I avoid paying for my PhD?

Answer the questions that have been on your mind with Joseph L. Brown, PhD
