For much of his 60-year career, Cormac McCarthy was America's best-kept literary secret, relentlessly crafting the finest novels of our time on his trademark Olivetti Lettera 32 typewriter. Then came *All the Pretty Horses*, *No Country for Old Men* and *The Road* — books that became award-winners, bestsellers and acclaimed movies over the last two decades.

McCarthy’s meticulous creative process is brought to light by the Wittliff Collections in the Albert B. Alkek Library at Texas State University, the premier research repository of Southwestern writers. As the crown jewel of the Wittliff’s literary treasury, the McCarthy archive is available to students, scholars, researchers … any and everyone seeking inspiration and an intimate behind-the-scenes look at a legendary writer's work.
